Professional Summary

Software Engineer with 5+ years of experience shipping production software, grounded in frontend engineering and expanding into backend and API development. Experienced with TypeScript, React, Next.js, REST APIs, Rust, Axum, PostgreSQL, SQLx, Docker, authentication, testing, monorepos, and CI/CD. Focused on maintainable systems, clear API boundaries, reliable delivery, and end-to-end problem solving.

Professional Experience

Herts Technologies, Hertsforthshare, UK

July 2024 – July 2026

Lead Frontend Engineer

- Led engineering across production applications, translating business requirements into maintainable software systems.
- Developed a private asset management platform with form-driven cataloging and inventory workflows.
- Led development of **Pillar**, an application for managing hospital staff and patients.
- Reduced compilation time from approximately 4 minutes to 1.7 minutes through codebase and build optimization.
- Built the company website from scratch and collaborated across product, design, and engineering.
- **Tech:** TypeScript, React, Recoil, Material UI, React Testing Library.

Cenofilab, Amsterdam, Netherlands

March 2024 – September 2024

Frontend Engineer

- Developed three production affiliate-platform applications, including two Shopify embedded apps.
- Built referral-link monitoring with 95% reported accuracy and integrated GraphQL APIs.
- Developed 15+ reusable packages in a Turbo monorepo, improving reuse and consistency.
- Implemented approximately 90% unit-test coverage for reliable releases.
- **Tech:** TypeScript, React, GraphQL, Turbo, Recoil, Jest, Shopify Polaris, Chakra UI.

Serveased Technologies Inc., Ontario, CA

September 2023 – March 2024

Frontend Engineer (Contract)

- Developed five business application modules supporting operational and administrative workflows.
- Built an employee benefits management system and contributed approximately 75% of the application interface.
- Collaborated with backend engineers on admin APIs and redesigned account workflows.
- **Tech:** TypeScript, Next.js, Recoil, Material UI, Headless UI, CSS, Git.

Enterscale, Lagos, Nigeria

November 2022 – June 2023

Frontend Engineer

- Built two survey modules for Mooyi, contributing to a reported 15% increase in usage.

- Delivered **Groundible Lagos** in under one week, supporting approximately 3,500 signups.
- Established frontend CI/CD workflows and worked across state, API integration, and UI architecture.
- **Tech:** TypeScript, JavaScript, Next.js, React, Recoil, Zustand, SCSS, Chakra UI, MUI, Tailwind CSS.

Mathis Fashion, Lagos, Nigeria

December 2021 – February 2023

Frontend Engineer

- Built analytics, messaging, tracking, and dashboard features for a production application.
- Migrated a Gatsby application to React and improved performance and usability.
- Developed component tests that reduced UI discrepancies by approximately 75% and implemented CI/CD.
- Collaborated with backend engineers on API contracts and integration.
- **Tech:** JavaScript, React, Next.js, Redux Toolkit, Zustand, Recharts, React Table, Tailwind CSS.

Hotels.ng, Lagos, Nigeria

August 2021 – September 2021

Frontend Developer Intern

- Led frontend development for **Zuri Chat**, reviewed pull requests, tested features, and helped teammates resolve blockers.
- **Tech:** JavaScript, React, Tailwind CSS, Git, Linear.

Engineering Projects

- **Check-et – Goal Tracking Platform:** Building a full-stack goal tracker with React Native/Expo and a Rust/Axum REST API. Designed authentication, protected routes, goal lifecycle management, DTOs, shared state, progress tracking, and PostgreSQL persistence. **Tech:** Rust, Axum, SQLx, PostgreSQL, Docker, Supabase, TypeScript, React Native, Expo.
- **Bitcoin Core Regtest Application:** Built a Rust application using Bitcoin Core JSON-RPC to create/load wallets, generate balances, construct transactions, inspect the mempool, mine blocks, and verify confirmations. **Tech:** Rust, Bitcoin Core, JSON-RPC, bitcoincore-rpc, Docker.
- **clear-comments:** Published an open-source TypeScript CLI for removing comments from JavaScript and TypeScript source code. **Tech:** TypeScript, Node.js, npm.

Technical Skills

Languages: TypeScript, JavaScript, Rust, SQL, HTML, CSS

Frontend: React, Next.js, React Native, Expo, Redux Toolkit, Zustand, Recoil, Tailwind CSS, Material UI

Backend: Rust, Axum, REST APIs, SQLx, PostgreSQL, Supabase, JSON-RPC

Engineering: API Design, Authentication, State Management, Data Modeling, Component Architecture, Monorepos, Testing

Infrastructure: Docker, CI/CD, Git/GitHub, Linux CLI, Turborepo, Bun, Biome
